

Introduction

The Mazda Bongo and the Ford Fredda also engineered by Mazda, are superb driving MPV / People Carriers. The current model was first manufactured in 1995, and given a facelift in 1999. We mostly stock the 125 BHP Turbo Diesel fitted with the superb 4-speed auto box in both 2-wheel drive and full time 4-wheel drive.

From time to time we stock the 5-speed manual, and the petrol engined cars, which are suitable for LPG conversions.

The Bongo's full list of standard equipment from it's front & rear air-conditioning-heating system, electric elevating roof, power steering, electric windows, electric folding mirrors, electric blinds on most models, rear heated window & wiper, makes this the most usable, and affordable camper van available today.

The Bongo people carrier with its factory fitted elevating roof lends itself to camper conversions. The roof opens fully at the touch of a button, push up the inner roof panel and you have all the headroom you require. At night if you require 2 additional beds, simply pull down the inner roof panel and you have an upper sleeping platform that can accommodate two adults.

At Calder Leisure we have been importing direct from Japan since 1996 (supplying more than 2,250 cars) our resident buyer in Japan inspects all vehicles before purchasing and can source any Bongo-Camper of your choice. We pride ourselves in buying only low mileage Grade 4 - 4.5 cars. All in excellent condition with guaranteed mileage certificates issued by BIMTA (The British Motor Trade Association) that guarantee's the mileage to be correct.

At Calder Leisure we always hold 20 plus Japanese Campers in stock.

Please note: Calder Leisure do not purchase low grade, high mileage vehicles at UK Auction Houses.

Features: Full Side Conversion £4000

As with all our conversions, we only use the best, vorringer board, SMEV appliances, fridge's, webasto-propex heating (optional), Fiamm awnings and bike racks (optional).
